Abstract of JP6093014

PURPOSE: To obtain a vaporizing extruder for removing volatile components such as solvent, water and unreacted monomer from a polymerization solution after the polymerization in solution polymerization of butadiene, etc.

CONSTITUTION: A vaporizing extruder wherein two or more vaporizing extruders 1a, 1b and 1c are connected in series is equipped with flash chambers 2a and 2b between a polymer outlet of the vaporizing extruder of the first stage and a feed opening of the vaporizing extruder of the second stage.
